

IN THE CLAIMS:

Please amend Claims 1 to 4 as follows. The claims, as pending in the subject application, read as follows:

1. (Currently Amended) A display apparatus, comprising:
a remote controller;
a display unit;
a connecting unit which forms a connection between the display apparatus and an external apparatus; and

a control unit which controls ~~the display unit and~~ the connecting unit to ~~operate~~ detect the display ~~apparatus unit~~ as a monitor of the external apparatus if a first operating mode is selected by the remote controller, and controls ~~the display unit and the~~ connecting unit to ~~operate~~ detect the display ~~apparatus unit~~ as a monitor of the display apparatus if a second operating mode is selected by the remote controller.

2. (Currently Amended) The display apparatus according to Claim 1, wherein, if the ~~first~~ second operating mode is selected, the connection unit disconnects the connection between the display apparatus and the external apparatus.

3. (Currently Amended) A method for a display apparatus, the display apparatus comprising a remote controller, a display unit and a connecting unit which forms a connection between the display apparatus and an external apparatus, the method comprising:

a first controlling step of controlling ~~the display unit~~ and the connecting unit to ~~operate~~ detect the display ~~apparatus~~ unit as a monitor of the external apparatus if a first operating mode is selected by the remote controller; and

a second controlling step of controlling ~~the display unit~~ and the connecting unit to ~~operate~~ detect the display ~~apparatus~~ unit as a monitor of the display apparatus if a second operating mode is selected by the remote controller.

4. (Currently Amended) The method according to Claim 3, further comprising a disconnecting step of disconnecting the connection between the display apparatus and the external apparatus if the ~~first~~ second operating mode is selected.
